

M01 – Measure Pupil Sheet

Learning Outcomes:

I can measure items in metres and centimetres and know how to convert between the two.

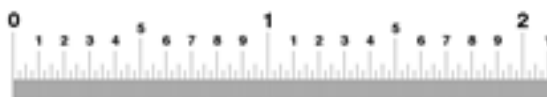

I can measure in Kilograms and grams and know how to convert between the two.

1. Measure the length of your classroom, at its longest point. Choose a suitable tool and record the answer below.

The classroom is m long, or cm.

2. Measure the length of the school playground using suitable tools.

The school playground is m, and cm long.

3. Find the weight of a maths textbook using a balance and weights.

My maths textbook weighs g, or kg.

4. Using the balance, compare the weights of your textbook and your jotter.

My textbook is heavier
lighter than my jotter.

It weighs grams more
less
